Compression Moulded Fibracon® PTFE Billets
Custom manufactured to your required size and polymer specification

Röchling Fibracon manufacture custom made compression moulded virgin and filled PTFE billets to your specified size of diameter, wall thickness and length.

- You specify your machined part size and we produce the stock shape with an economic machining allowance
- You specify the stock shape dimensions (diameter, section and length) and we make to that size

Your advantages
- Helps minimise your material waste
- Decrease stock holding value
- Eliminate pre-cutting to length
- Reduces your machining time
- Full traceability of manufacturing process from raw material to sintered billet

Polymer Selection
Our experienced staff will assist you in the selection of the suitable polymer for your application. Röchling Fibracon offers:

- Standard grades of virgin and filled PTFE from the major manufacturers – you specify or leave it to us
- Custom made to your specification where you specify the grade of PTFE and filler for your application e.g. carbon, graphite, bronze, glass, pigments, polymers, carbon fibre, molybdenum disulphide. More than 70 grades of polymer and PTFE compound held in stock.

Service
- Same day quotation
- Average 7-10 days delivery
- Break-down service available on request; subject to premium
- Ship from stock agreements for next day delivery
- Packaging & labeling to your specification
- Mechanical testing of materials
- Full oven-cycle data & traceability

Product range
- Over 2000 tooling combinations allow production close to finished part size
- Dimensions subject to material selection and tooling
